List of Contents

NUMBER 1

C. Y. Robert Wu	1	Assignments of autoionization states of O_2
J.-P. Bouanich	17	Vibration–rotational matrix elements for infrared transitions of diatomic molecules
D. J. McLaughlin, K. J. LaGattuta and **Y. Hahn**	47	Dielectronic recombination rates for the Be sequence
D. N. Ghosh Roy and **L. D. Waters**	55	Steepest descent inversion of plasma spectral intensities
I. Hubeny and **J. Oxenius**	65	Absorption and emission line profile coefficients of multilevel atoms—III. Generalized atomic redistribution functions for three-photon processes
Markandey Singh and **Jai Prakash Chaturvedi**	81	Vibrational transition probabilities and $\bar{r}$-centroids for NH
R. Daniel and **G. C. Pomraning**	85	Multigroup linear transport in the exponential half-space—I
R. Daniel, V. C. Badham and **G. C. Pomraning**	97	Multigroup linear transport in the exponential half-space—II
Software Survey Section	I	

NUMBER 2

Kwan Kim	107	Integrated infrared intensities of methane
C. E. Siewert and **J. R. Thomas Jr**	111	A method for computing the discrete spectrum basic to multi-group transport theory
E. C. Rea Jr, A. Y. Chang and **R. K. Hanson**	117	Shock-tube study of pressure broadening of the $A^2\Sigma^+$–$X^2\Pi(0,0)$ band of OH by Ar and N_2
R. H. Krech, L. M. Cowles, G. E. Caledonia and **D. I. Rosen**	129	The high temperature absorption of CO_2 laser radiation by SF_6, NF_3, and NH_3
K. J. Nieuwesteeg, Tj. Hollander and **C. Th. J. Alkemade**	141	Spectrum and polarization of collision-induced fluorescence and Rayleigh components of Na*D* lines at quasi-resonant excitation
A. Streater, J. Cooper and **W. Sandle**	151	On time-dependent radiative transfer

R. W. Berends, W. Kedzierski and **L. Krause**	157	$5^2P_{1/2}$–$5^2P_{3/2}$ fine-structure mixing in potassium atoms induced by collisions with noble gases
Thomas J. McGee and **John Burris Jr**	165	SO_2 absorption cross sections in the near u.v.
J. Migdalek and **W. E. Baylis**	183	Relativistic SCF calculations of transitions in the principal and intercombination series of mercury
A. L. Crosbie and **M. Pattabongse**	193	Radiative ignition in a planar medium
Notes		
A. Soufiani and **J. M. Hartmann**	205	Measurements and calculations of CO–H_2O line-widths at high temperature
N. Rajamanickam	207	Intensity distribution in the bands of the $D1 \rightarrow X^1\Sigma^+$ system of PbO
Software Survey Section	I	

NUMBER 3

J. Hildebrandt	211	Dispersive plasma-satellites of a dipole-forbidden transition and the rotating field model
B. R. Lewis, L. Berzins and **J. H. Carver**	219	Oscillator strengths for the Schumann–Runge bands of $^{16}O^{18}O$
B. R. Lewis, L. Berzins and **J. H. Carver**	229	Predissociation linewidths for the Schumann–Runge bands of $^{18}O_2$
B. R. Lewis, L. Berzins and **J. H. Carver**	243	Predissociation linewidths for the Schumann–Runge bands of $^{16}O^{18}O$
B. R. Lewis, L. Berzins and **J. H. Carver**	255	Oscillator strengths for the Schumann–Runge bands of $^{18}O_2$
C. A. van den Wijngaart, P. Kuik, H. A. Dijkerman, Tj. Hollander and **C. Th. J. Alkemade**	267	Collisional repopulation of excited Na-states upon laser-pumping in an H_2–O_2–Ar flame
M. Lamoureux, R. Cauble, Longhuan Kim, F. Perrot and **R. H. Pratt**	283	Comparison of atomic potentials and bremsstrahlung Gaunt factors in dense aluminum plasmas
B. D. Ganapol and **G. C. Pomraning**	297	On the use of the Rosseland and Planck mean absorption coefficients in the non-equilibrium radiative transfer equation
N. Konjević and **T. L. Pittman**	311	Stark broadening of spectral lines of homologous, doubly-ionized inert gases
Software Survey Section	I	

NUMBER 4

A. L. Crosbie and **M. Pattabongse** 319 Transient conductive and radiative transfer in a planar layer with Arrhenius heat generation

J. Borsenberger, J. Oxenius and **E. Simonneau** 331 Resonance line transfer and transport of excited atoms—II. Self-consistent solutions (1)

V. P. Bellary and **T. K. Balasubramanian** 359 Rotational intensity factors for $^2\Sigma$–$^4\Sigma$ transitions in diatomic molecules

K. M. Gierens, G. Traving and **R. Wehrse** 361 Formation of resonance lines in media with stochastic depth dependence of the Planck function

M. Pavlov and **M. Terzić** 373 Influence of the glass-to-plasma boundary layers in a T-tube on the H_β line profile

D. Cope and **R. J. Lovett** 377 A general expression for the Voigt profile

R. Buteikis, E. Našlėnas, J. Oberauskas and **P. Serapinas** 391 Dynamics of the continuum radiation of a low-voltage spark-discharge plasma

I. Hubeny and **J. Oxenius** 397 Absorption and emission line profile coefficients of multi-level atoms—IV. Velocity-averaged generalized redistribution functions for three-photon processes

E. A. Gussmann 407 The weighting-function method in the computation of solar and stellar spectra

Notes

Kouichi Kamiuto 411 Study of the Henyey–Greenstein approximation to scattering phase functions

S. Buddhudu and **V. Ramesh Babu** 415 Spectra of $Pr(NO_3)_36H_2O$ complexes in alcohols

Software Survey Section I

NUMBER 5

Jay B. Jeffries, Richard A. Copeland and **David R. Crosley** 419 Transition probabilities in the $C^2\Sigma^+$–$X^2\Pi$ system of CH

Tsu-Jye A. Nee and **Guoxong Chen** 425 Opacity effects on near-resonance-Rayleigh scattering in a barium plasma

B. L. Drolen and **C. L. Tien** 433 Absorption and scattering of agglomerated soot particulate

J. B. Koffend, J. S. Holloway, M. A. Kwok and **R. F. Heidner III** 449 High resolution absorption spectroscopy of NO_2

Kouichi Kamiuto and **Jyunko Seki** 455 Study of the P_1 approximation in an inverse scattering problem

Ya-Qui Jin and **Ronald G. Isaacs** 461 Simulation and statistical retrieval for inhomogeneous nonisothermal atmospheric precipitation

R. W. Richardson and **S. M. Berman** 471 Determination of the excited state density for an optically thick resonance line

Gérard Henrion, Michel Fabry and **Michel Remy** 477 Determination of oscillator strengths for U_I and U_{II} lines

D. G. Goodwin and **J. L. Ebert** 501 Rigorous bounds on the radiative interaction between real gases and scattering particles

R. D. Skocypec and **R. O. Buckius** 509 Comments on "Rigorous bounds on the radiative interaction between real gases and scattering particles" by D. G. Goodwin and J. L. Ebert

Note

Sidney A. Self 513 Comment on "Rigorous bounds on the radiative interaction between real gases and scattering particles" by D. G. Goodwin and J. L. Ebert

Software Survey Section I Adaptation of the Relativistic Multiconfiguration Dirac–Fock/MCDF/Program to Microcomputers; FASCOD2 (Fast Atmospheric Signature Code)

NUMBER 6

L. Rothberg, T. M. Jedju and **K. Lawrence** 515 Pulsed optoacoustic spectroscopy for calorimetry without a standard

J. Migdalek and **W. E. Baylis** 521 A multiconfiguration Dirac–Fock study of the $6s^2\,{}^1S_0$–$6s6p\,{}^3P_1$, ${}^1P_1$ transitions in the Yb isoelectronic sequence

A. K. Bhatia and **S. O. Kastner** 527 Atomic parameters for carbon-like S XI

A. Bauer, M. Godon, M. Kheddar, J. H. Hartmann, J. Bonamy and **D. Robert** 531 Temperature and perturber dependences of water-vapor 380 GHz-line broadening

G. D. T. Tejwani and **K. Fox** 541 Calculated self- and foreign-gas-broadened linewidths for SF_6

J. P. Looney and **R. M. Herman** 547 Air broadening of the hydrogen halides—I. N_2-broadening and shifting in the HCl fundamental

K. R. Karim and **C. P. Bhalla** 559 Atomic parameters for doubly-excited heliumlike silicon

George F. Spagna Jr and **Chun Ming Leung** 565 Numerical solution of the radiation transport equation in disk geometry

J. Migdalek and **M. Wyrozumska** 581 Relativistic oscillator strengths for the Cs isoelectronic sequence and collapse of *f* and *d* orbitals
